

The Emergency Tent System was developed to provide immediate shelter to people displaced by calamity or disaster. It can serve as a temporary shelter until such time the people can rebuild and return to their homes after the effects of calamities or disasters have ebbed away.

Its development will benefit the metalworking and garments sector, because the tent system is cost effective and durable, and is designed to enable fast manufacturing.

#### SPECIFICATIONS:

1. Outer tent
  - Poly-cotton: 60% cotton, 40% polyester
  - Color: white
  - Specific weight: 350g/m<sup>2</sup> (max)
2. Ground sheet
  - Woven polyethylene fabric coated on both sides with low-density polyethylene
  - Specific weight: 180 g/m<sup>2</sup>
  - Tensile strength: 300N for warp and weft
  - Tear resistance: 60N warp and weft
3. Mosquito net for windows and outer tent
  - 100% polyester
  - Mesh size: 25 holes/cm<sup>2</sup>
